Boiler Service

PBBS Equipment provides service on a variety of commercial and industrial boilers in sizes ranging from those heating small office or apartment buildings to those providing process or heating steam to large industrial factories or hospital complexes. We specialize in servicing boilers beyond the capabilities of the local residential heating/plumbing service companies.

Our scope of boiler service includes the following types:

Types	Systems	Fuels
Firetube	Steam	Gas Fired
Watertube	Hot Water	Oil Fired, #2 to #6
Electric	Thermal Fluid	LP Fired
Electrode	Hot Oil	Electric
n/a	n/a	Alternate Fuels: Methane
Pulse	n/a	Digester Gas, Sewer Gas, Etc.

We offer complete repair services on any and all boiler related equipment, including auxiliary equipment, pumps and controls:
